

# ORNTALVET ORNTALFORTEVET

## A BROAD SPECTRUM ANTHELMINTIC

### Composition

#### Each bolus contains:

Morantel Citrate Monohydrate IP 594mg  
Excipients q.s.

#### Each bolus contains:

Morantel Citrate Monohydrate IP 118.8mg  
Excipients q.s.

### Indication

**ORNTALFORTEVET** is indicated for the removal and control of immature and adult gastrointestinal roundworms in cattle, buffaloes, sheep, goats, horses, pigs and camels. **ORNTALFORTEVET** is highly effective against the following gastrointestinal roundworms.

#### Cattle and Buffaloes :

- \* Haemonchus placei
- \* Ostertagia ostertagi
- \* Trichostrongylus axei
- \* Trichostrongylus colubriformis
- \* Toxocara vitulorum
- \* Cooperia pectinata
- \* Cooperia punctata
- \* Oesophagostomum radiatum

#### Sheep and goats :

- \* Haemonchus contortus
- \* Ostertagia ostertagi
- \* Trichostrongylus axei
- \* Trichostrongylus colubriformis
- \* Nematodirus spp.
- \* Gaigeria pachyscelis
- \* Chabertia ovina
- \* Cooperia ovina
- \* Oesophagostomum columbianum

#### camels :

- \* Haemonchus spp.
- \* Trichostrongylus spp.
- \* Trichuris spp.
- \* Oesophagostomum spp.

**ORNTALFORTEVET** has also been successfully used in the treatment of Pica (mud-eating habit) in Indian camels caused by gastrointestinal roundworms.

#### Horses, Mules & Donkeys :

- \* Parascaris spp.
- \* Trichonema spp.
- \* Triodontophorus spp.
- \* Oxyuris spp.
- \* Strongylus vulgaris
- \* Strongylus edentatus
- \* Strongylus equinus

#### Pigs :

For the mature and immature Ascaris infections, Oesophagostomum infections, Hyostrongylus infections and mixed infections.

### Dosage

**Canine:** N/A

#### Sheep, Goats :

For the control of mature and immature gastrointestinal roundworms, 594 mg of morantel base per kg.b.wt. is recommended.

#### Poultry:

#### Large Animals

#### Cattle, Buffaloes, calves, horses, mules, donkeys and camels :

For the control of mature and immature gastrointestinal roundworms, 118.8 mg of **Morantel** base per kg.b.wt. is recommended.

For horses, use only tablets or boluses. Use of **ORNTALFORTEVET** solution is not recommended.

### Others Precautions

\* Unlike many other anthelmintics **ORNTALFORTEVET** offers a major benefit of **No milk discard** with a single treatment. Thus **ORNTALFORTEVET** saves precious milk from wastage. This makes **ORNTALFORTEVET** an economical dewormer for dairy animals.

\* **ORNTALFORTEVET** is safe at 15-20 times the recommended dose.

\* **ORNTALFORTEVET** is safe for pregnant animals in all stages of gestation with unimpaired reproductive efficiency.

\* **ORNTALFORTEVET** is safe for young and debilitated animals.

\* **ORNTALFORTEVET** can be safely used along with other treatment products without affecting the efficiency of either.

### Compatibility

\* **ORNTALFORTEVET** is compatible with cobalt and selenium. In drug compatibility studies in cattle and sheep using **ORNTALFORTEVET** along with a number of other treatments, no specific contraindications were observed.
